

When to use petzey

There is no debate, we love our pets.

But in today's world, access to affordable pet healthcare can be tougher than ever. We're here to help.

Petzey is a mobile app that enables you to get real-time virtual pet health and wellness consultations, all on your smartphone. We're here not only for urgent concerns, but also general questions to gain peace of mind.

No question is too big or too small.

Here are some examples you can ask for your first consultation:

- What human foods are safe for my pet?
- How often should I brush my pet's teeth?
- Why is my pet destroying my furniture?
- How can I help reduce my pet's anxiety?
- Can I get a second opinion on my pet's medication?

In the event you need to visit a vet clinic or hospital, we'll help find ones near you.
